CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

JANUARY 1983 VOLUME 71 NUMBER 1

1 Specific adherence of *Escherichia coli* (strain RDEC-1) to membranous (M) cells of the Peyer's patch in *Escherichia coli* diarrhea in the rabbit. *Lindsey R. Inman and J. Robert Cantey*

9 Identification of human and rodent thymic epithelium using tetanus toxin and monoclonal antibody A2B5. *Barton F. Haynes, Kazuo Shimizu, and George S. Eisenbarth*

15 Intracellular multiplication of Legionnaires' disease bacteria (*Legionella pneumophila*) in human monocytes is reversibly inhibited by erythromycin and rifampin. *Marcus A. Horwitz and Samuel C. Silverstein*

27 Preferential binding of vasoactive intestinal polypeptide to basolateral membrane of rat and rabbit enterocytes. *Kiertisin Dharmsathaphorn, Verna Harms, Darrell J. Yamashiro, Richard J. Hughes, Henry J. Binder, and Ernest M. Wright*

36 Immunomodulatory effect of procainamide in man. Inhibition of human suppressor T-cell activity in vitro. *T. Ochi, E. A. Goldings, P. E. Lipsky, and M. Ziff*

46 Regulation of immunoglobulin E antibody synthesis in man by antiidiotypic antibodies. *Raif S. Geha and Marc Comunale*

55 Effect of carbonic anhydrase inhibition on superficial and deep nephron bicarbonate reabsorption in the rat. *Thomas D. DuBose, Jr., and Marjory S. Lucci*

66 Species-related innate resistance to *Schistosoma mansoni*. Role of mononuclear phagocytes in schistosomula killing in vitro. *Charles A. Peck, Murray D. Carpenter, and Adel A. F. Mahmoud*

73 Hepatic metabolism of 3α-hydroxy-5β-etianic acid (3α-hydroxy-5β-androstan-17β-carboxylic acid) in the adult rat. *Joanna M. Little, Jan St. Pyrek, and Roger Lester*

81 Metabolic and cellular alterations underlying the exaggerated renal prostaglandin and thromboxane synthesis in ureter obstruction in rabbits. Inflammatory response involving fibroblasts and mononuclear cells. *Tadao Okegawa, Phyllis E. Jonas, Katherine DeSchryver, Akiyoshi Kawasaki, and Philip Needleman*

91 Role for intrarenal mechanisms in the impaired salt excretion of experimental nephrotic syndrome. *I. Ichikawa, H. G. Rennke, J. R. Hoyer, K. F. Badr, N. Schor, J. L. Troy, C. P. Lechene, and B. M. Brenner*

104 Hemodynamic sequelae of regression of experimental atherosclerosis. *Mark L. Armstrong, Donald D. Heistad, Melvin L. Marcus, Donald J. Piegors, and Francois M. Abboud*

114 Human eosinophil arylsulfatase B. Structure and activity of the purified tetrameric lysosomal hydrolase. *Peter F. Weller and K. Frank Austen*

124 Beta endorphin selectively stimulates aldosterone secretion in hypophysectomized, nephrectomized dogs. *Hans-Georg Güllner and John R. Gill, Jr.*

129 Detection and partial characterization of antibacterial factor(s) in alveolar lining material of rats. *J. Donald Coonrod and Kokichi Yoneda*

142 Role of the 26-hydroxylase in the biosynthesis of bile acids in the normal state and in cerebrotendinous xanthomatosis. An in vivo study. *Ingemar Björkhem, Olav Fausa, Gunnar Hopen, Helge Oftebro, Jan I. Pedersen, and Sverre Skrede*

149 Inactivation of kallikrein in human plasma. *Fedde van der Graaf, Johannes A. Koedam, and Bonna N. Bouma*

159 Reversal of shortened platelet survival in rats by the antifibrinolytic agent, epsilon aminocaproic acid. *P. D. Winocour, R. L. Kinlough-Rathbone, M. Richardson, and J. F. Mustard*

165 Cyclosporin A-treated guinea pig responder cells secrete a genetically restricted factor that suppresses the mixed leukocyte reaction. *George A. DosReis and Ethan M. Shevach*

170 In vitro culture of cells exfoliated In the urine by patients with diabetes mellitus. *Carol J. Detrisac, Ronald K. Mayfield, John A. Colwell, A. Julian Garvin, and Donald A. Sens*

JANUARY AUTHOR INDEX

CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

FEBRUARY 1983 VOLUME 71 NUMBER 2

175 Dietary components that regulate serum somatomedin-C concentrations in humans. *William L. Isley, Louis E. Underwood, and David R. Clemmons*

183 Two types of dysfunctional eighth component of complement (C8) molecules in C8 deficiency in man. Reconstitution of normal C8 from the mixture of two abnormal C8 molecules. *F. Tedesco, P. Densen, M. A. Villa, B. H. Petersen, and G. Sirchia*

192 Resistance to 1,25-dihydroxyvitamin D. Association with heterogeneous defects in cultured skin fibroblasts. *Uri A. Liberman, Charles Eil, and Stephen J. Marx*

201 Evaluation of chloride/bicarbonate exchange in the human colon in vivo. *Glenn R. Davis, Stephen G. Morawski, Carol A. Santa Ana, and John S. Fordtran*

208 Motor function of the opossum sphincter of Oddi. *James Toouli, Wylie J. Dodds, Ryuichi Honda, Sushil Sarna, Walter J. Hogan, Richard A. Komarowski, John H. Linehan, and Ronald C. Arndorfer*

221 Involvement of immunoglobulin E in the secretory processes of alveolar macrophages from asthmatic patients. *Michel Joseph, André-Bernard Tonnel, Gérard Torpier, André Capron, Bernard Arnoux, and Jacques Benveniste*

231 Deficient adenylate cyclase regulatory protein in renal membranes from a patient with pseudohypoparathyroidism. *Robert W. Downs, Jr., Michael A. Levine, Marc K. Drezner, Warner M. Burch, Jr., and Allen M. Spiegel*

236 Primate erythrocyte-immune complex-clearing mechanism. *J. B. Cornacoff, L. A. Hebert, W. L. Smead, M. E. VanAman, D. J. Birmingham, and F. J. Waxman*

248 Selective inhibition of follicle-stimulating hormone secretion by estradiol. Mechanism for modulation of gonadotropin responses to low dose pulses of gonadotropin-releasing hormone. *John C. Marshall, Gary D. Case, Timothy W. Valk, Kevin P. Corley, Sue Ellen Sauder, and Robert P. Kelch*

258 Inhibition of glutathione synthesis augments lysis of murine tumor cells by sulfhydryl-reactive antineoplastics. *Bradley A. Arrick, Carl F. Nathan, and Zanvil A. Cohn*

268 Lack of effect of peritubular protein on passive NaCl transport in the rabbit proximal tubule. *Christine A. Berry*

282 Disorders of B cells and helper T cells in the pathogenesis of the immunoglobulin deficiency of patients with ataxia telangiectasia. *T. A. Waldmann, S. Broder, C. K. Goldman, K. Frost, S. J. Korsmeyer, and M. A. Medici*

296 Deficient autologous mixed lymphocyte reaction in Kaposi's sarcoma associated with deficiency of Leu-3$^+$ responder T cells. *Sudhir Gupta and Bijan Safai*

301 Immunoglobulin gene rearrangement and cell surface antigen expression in acute lymphocytic leukemias of T cell and B cell precursor origins. *Stanley J. Korsmeyer, Andrew Arnold, Ajay Bakhshi, Jeffrey V. Ravetch, Uli Siebenlist, Philip A. Hieter, Susan O. Sharrow, Tucker W. LeBien, John H. Kersey, David G. Poplack, Philip Leder, and Thomas A. Waldmann*

314 Z-DNA-specific antibodies in human systemic lupus erythematosus. *Eileen M. Lafer, Rosaura P. C. Valle, Achim Möller, Alfred Nordheim, Peter H. Schur, Alexander Rich, and B. David Stollar*

322 Unanticipated stimulatory action of glucocorticoids on epithelial calcium absorption. Effect of dexamethasone on rat distal colon. *David B. N. Lee*

329 Characterization of a carboxyterminal peptide fragment of the human choriogonadotropin β-subunit excreted in the urine of a woman with choriocarcinoma. *Sania Amr, Robert E. Wehmann, Steven Birken, Robert E. Canfield, and Bruce C. Nisula*

340 Regulation of colony-stimulating activity production. Interactions of fibroblasts, mononuclear phagocytes, and lactoferrin. *Grover C. Bagby, Jr., Elaine McCall, and Don L. Layman*

345 Effect of age and environmental factors on insulin release from the perfused pancreas of the rat. *Eve Reaven, Donald Curry, Jorene Moore, and Gerald Reaven*

351 Acetyl glyceryl ether phosphorylcholine-stimulated human platelets cause pulmonary hypertension and edema in isolated rabbit lungs. Role of thromboxane A_2. *John E. Heffner, Steven A. Shoemaker, E. Michael Canham, Mahesh Patel, Ivan F. McMurtry, Helen G. Morris, and John E. Repine*

358 Changes in size, subclass, and metabolic properties of serum immunoglobulin A in liver diseases and in other diseases with high serum immunoglobulin A. *D. L. Delacroix, K. B. Elkon, A. P. Geubel, J. F. Hodgson, C. Dive, and J. P. Vaerman*

368 Thrombolysis with human extrinsic (tissue-type) plasminogen activator in rabbits with experimental jugular vein thrombosis. Effect of molecular form and dose of activator, age of the thrombus, and route of administration. *D. Collen, J. M. Stassen, and M. Verstraete*

377 Effect of hemodialysis on left ventricular function. Dissociation of changes in filling volume and in contractile state. *J. V. Nixon, Jere H. Mitchell, John J. McPhaul, Jr., and William L. Henrich*

RAPID PUBLICATIONS

385 Diagnosis of Bernard-Soulier syndrome and Glanzmann's thrombasthenia with a monoclonal assay on whole blood. *Robert R. Montgomery, Thomas J. Kunicki, Cynthia Taves, Dominique Pidard, and Michael Corcoran*

390 Leupeptin inhibits adrenocorticotropic hormone-induced protein breakdown in the conscious dog. *Ben McCallister, William W. Lacy, Phillip E. Williams, and Naji N. Abumrad*

395 Fluorescence of experimental atheromatous plaques with hematoporphyrin derivative. *J. Richard Spears, Juan Serur, Deborah Shropshire, and Sven Paulin*

400 Abnormal regulation of renal 25-hydroxyvitamin D-1α-hydroxylase activity in the X-linked hypophosphatemic mouse. *Bruce Lobaugh and Marc K. Drezner*

404 Circulating bovine lymphocytes contain receptors for parathyroid hormone. *Itsuo Yamamoto, John T. Potts, Jr., and Gino V. Segre*

409 CORRECTION

FEBRUARY AUTHOR INDEX

CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

MARCH 1983 VOLUME 71 NUMBER 3

411 Bactericidal versus bacteriostatic antibiotic therapy of experimental pneumococcal meningitis in rabbits. *W. Michael Scheld and Merle A. Sande*

420 2-Methylthioadenosine[β-^{32}P]diphosphate. An agonist and radioligand for the receptor that inhibits the accumulation of cyclic AMP in intact blood platelets. *Donald E. Macfarlane, Prem C. Srivastava, and David C. B. Mills*

429 Hepatic lipid peroxidation in vivo in rats with chronic iron overload. *Bruce R. Bacon, Anthony S. Tavill, Gary M. Brittenham, C. H. Park, and Richard O. Recknagel*

440 Intrinsic factor-mediated absorption of cobalamin by guinea pig ileal cells. *Cyrus R. Kapadia, Del Serfilippi, Kurt Voloshin, and Robert M. Donaldson, Jr.*

449 Cholesterol net transport, esterification, and transfer in human hyperlipidemic plasma. *Phoebe E. Fielding, Christopher J. Fielding, Richard J. Havel, John P. Kane, and Peggy Tun*

461 α-Thalassemia caused by an unstable α-globin mutant. *Stephen A. Liebhaber and Yuet Wai Kan*

467 Persistent glucose production during glucose infusion in the neonate. *Richard M. Cowett, William Oh, and Robert Schwartz*

476 Adrenergic regulation of glycogenolysis in rat liver after cholestasis. Modulation of the balance between alpha$_1$ and beta$_2$ receptors. *Martine Aggerbeck, Nicolas Ferry, Elie-Serge Zafrani, Marie-Claude Billon, Robert Barouki, and Jacques Hanoune*

487 Electrical charge. Its role in the pathogenesis and prevention of experimental membranous nephropathy in the rabbit. *Sharon G. Adler, Haiyen Wang, Harry J. Ward, Arthur H. Cohen, and Wayne A. Border*

500 Whole body clearance of norepinephrine. The significance of arterial sampling and of surgical stress. *Jannik Hilsted, Niels J. Christensen, and Sten Madsbad*

506 Characterization of inactive renin from human kidney and plasma. Evidence of a renal source of circulating inactive renin. *W. A. Hsueh, E. J. Carlson, and V. J. Dzau*

518 Trifluoperazine inhibits the contraction of cultured rat cardiac cells and the phosphorylation of myosin light chain. *Irwin Klein*

525 Specific high-affinity binding of high density lipoproteins to cultured human skin fibroblasts and arterial smooth muscle cells. *Robert Biesbroeck, John F. Oram, John J. Albers, and Edwin L. Bierman*

540 Role of charge and hydrophobic interactions in the action of the bactericidal/permeability-increasing protein of neutrophils on gram-negative bacteria. *Jerrold Weiss, Michael Victor, and Peter Elsbach*

550 Chronic hyperglycemia reduces surface active material flux in tracheal fluid of fetal lambs. *David Warburton*

556 Regulation of human immunoglobulin E synthesis in acute graft versus host disease. *John A. Saryan, Joel Rappeport, Donald Y. M. Leung, Robertson Parkman, and Raif S. Geha*

565 In vitro desensitization of beta adrenergic receptors in human neutrophils. Attenuation by corticosteroids. *Albert O. Davies and Robert J. Lefkowitz*

572 Epinephrine is a hypophosphatemic hormone in man. Physiological effects of circulating epinephrine on plasma calcium, magnesium, phosphorus, parathyroid hormone, and calcitonin. *Jean-Jacques Body, Philip E. Cryer, Kenneth P. Offord, and Hunter Heath*

579 Role of calmodulin in thyroid hormone stimulation in vitro of human erythrocyte Ca^{2+}-ATPase activity. *Faith B. Davis, Paul J. Davis, and Susan D. Blas*

587 Effect of synthetic ovine corticotropin-releasing factor. Dose response of plasma adrenocorticotropin and cortisol. *David N. Orth, Richard V. Jackson, G. Stephen DeCherney, C. Rowan DeBold, A. Nancye Alexander, Donald P. Island, Jean Rivier, Catherine Rivier, Joachim Spiess, and Wylie Vale*

596 Gallbladder and small intestinal regulation of biliary lipid secretion during intraduodenal infusion of standard stimuli. *Gregory T. Everson, Michael J. Lawson, Carol McKinley, Radene Showalter, and Fred Kern, Jr.*

604 In vivo studies of serum C-reactive protein turnover in rabbits. *Mohanatheesan Chelladurai, Stephen S. Macintyre, and Irving Kushner*

611 Lactoferrin binds to cell membrane DNA. Association of surface DNA with an enriched population of B cells and monocytes. *Robert M. Bennett, Julianne Davis, Stephen Campbell, and Scott Portnoff*

619 Reduced surface expression and binding of fibronectin by thrombin-stimulated thrombasthenic platelets. *Mark H. Ginsberg, Jane Forsyth, Alton Lightsey, Juan Chediak, and Edward F. Plow*

625 Hereditary tyrosinemia and the heme biosynthetic pathway. Profound inhibition of δ-aminolevulinic acid dehydratase activity by succinylacetone. *Shigeru Sassa and Attallah Kappas*

635 Intermediate filaments in malignant melanomas. Identification and use as marker in surgical pathology. *F. C. S. Ramaekers, J. J. G. Puts, O. Moesker, A. Kant, G. P. Vooijs, and P. H. K. Jap*

644 Regulation of the fasting enterohepatic circulation of bile acids by the migrating myoelectric complex in dogs. *R. B. Scott, S. M. Strasberg, T. Y. El-Sharkawy, and N. E. Diamant*

655 Plasma low density lipoprotein transport kinetics in noninsulin-dependent diabetes mellitus. *Ahmed H. Kissebah, Salman Alfarsi, David J. Evans, and Peter W. Adams*

668 Effect of penicillin on the adherence of *Streptococcus sanguis* in vitro and in the rabbit model of endocarditis. *Franklin D. Lowy, Daniel S. Chang, Ellen G. Neuhaus, Diane S. Horne, Alexander Tomasz, and Neal H. Steigbigel*

676 Endogenous biosynthesis of prostacyclin and thromboxane and platelet function during chronic administration of aspirin in man. *Garret A. FitzGerald, John A. Oates, Jacek Hawiger, Richard L. Maas, L. Jackson Roberts II, John A. Lawson, and Alan R. Brash*

689 Abnormal α2-chain in type I collagen from a patient with a form of osteogenesis imperfecta. *Peter H. Byers, Jay R. Shapiro, David W. Rowe, Karen E. David, and Karen A. Holbrook*

698 Insulin resistance in uremia. Characterization of insulin action, binding, and processing in isolated hepatocytes from chronic uremic rats. *James M. Kauffman and Jose F. Caro*

709 Marked increase in insulin sensitivity of human fat cells 1 hour after glucose ingestion. *Peter Arner, Jan Bolinder, and Jan Östman*

715 Sex-related differences in gastrin release and parietal cell sensitivity to gastrin in healthy human beings. *M. Feldman, C. T. Richardson, and J. H. Walsh*

721 Opposing actions of glucagon and insulin on splanchnic D cell function. *Koichi Kawai and Roger H. Unger*

726 Regulation of renal blood flow by plasma chloride. *Christopher S. Wilcox*

736 Effects of extracellular fluid volume and plasma bicarbonate concentration on proximal acidification in the rat. *Robert J. Alpern, Martin G. Cogan, and Floyd C. Rector, Jr.*

747 Retinol esterification by microsomes from the mucosa of human small intestine. Evidence for acyl-coenzyme A retinol acyltransferase activity. *Per Helgerud, Lizette Balle Petersen, and Kaare A. Norum*

754 Pathogenesis of the adult respiratory distress syndrome. Evidence of oxidant activity in bronchoalveolar lavage fluid. *Charles G. Cochrane, Roger Spragg, and Susan D. Revak*

762 Reduced platelet thromboxane formation in uremia. Evidence for a functional cyclooxygenase defect. *G. Remuzzi, A. Benigni, P. Dodesini, A. Schieppati, M. Livio, G. De Gaetano, J. S. Day, W. L. Smith, E. Pinca, P. Patrignani, and C. Patrono*

RAPID PUBLICATIONS

769 Human renal carcinoma cells produce hypercalcemia in the nude mouse and a novel protein recognized by parathyroid hormone receptors. *Gordon J. Strewler, Richard D. Williams, and Robert A. Nissenson*

775 Direct detection of the common Mediterranean β-thalassemia gene with synthetic DNA probes. An alternative approach for prenatal diagnosis. *Stuart H. Orkin, Alexander F. Markham, and Haig H. Kazazian, Jr.*

780 Resistance of Melanesian elliptocytes (ovalocytes) to invasion by *Plasmodium knowlesi* and *Plasmodium falciparum* malaria parasites in vitro. *Terence Hadley, Allan Saul, Gretel Lamont, Diane E. Hudson, Louis H. Miller, and Chev Kidson*

783 March Author Index

CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

APRIL 1983 VOLUME 71 NUMBER 4

785 Switch from fetal to adult hemoglobin is associated with a change in progenitor cell population. *Rona S. Weinberg, Judith D. Goldberg, J. Matthew Schofield, Alexandra L. Lenes, Roger Styczynski, and Blanche P. Alter*

795 Inhibition of the lytic action of cell-bound terminal complement components by human high density lipoproteins and apoproteins. *Stephen I. Rosenfeld, Charles H. Packman, and John P. Leddy*

809 Effect of captopril on uterine blood flow and prostaglandin E synthesis in the pregnant rabbit. *Thomas F. Ferris and Edward K. Weir*

816 Regulation of hepatic lipoprotein receptors in the dog. Rapid regulation of apolipoprotein B,E receptors, but not of apolipoprotein E receptors, by intestinal lipoproteins and bile acids. *Bo Angelin, Carol A. Raviola, Thomas L. Innerarity, and Robert W. Mahley*

832 Immune-mediated thrombocytopenia of malaria. *John G. Kelton, Jay Keystone, Jane Moore, Gregory Denomme, Elaine Tozman, Michael Glynn, Peter B. Neame, Jack Gauldie, and James Jensen*

837 Evidence for restoration of hepatic glucose processing in type I diabetes mellitus. *Thomas T. Aoki, Fredericka V. Vlachokosta, Milton C. Foss, and Mary T. Meistas*

840 Structure-activity relationships of somatostatin analogs in the rabbit ileum and the rat colon. *Linda E. Rosenthal, Darrell J. Yamashiro, Jean Rivier, Wylie Vale, Marvin Brown, and Kiertisin Dharmsathaphorn*

850 Familial incomplete male pseudohermaphroditism associated with impaired nuclear androgen retention. Studies in cultured skin fibroblasts. *Charles Eil*

859 Feedback inhibition of adrenocorticotropic hormone by physiological increases in plasma corticosteroids in conscious dogs. *Maureen E. Keller-Wood, Jeannette Shinsako, and Mary F. Dallman*

867 Influence of steady-state alterations in acid-base equilibrium on the fate of administered bicarbonate in the dog. *Horacio J. Adrogué, Jeffrey Brensilver, Jordan J. Cohen, and Nicolaos E. Madias*

884 Interactions between 8-L-arginine vasopressin and prostaglandin E_2 in human mononuclear phagocytes. *Rudolf Locher, Wilhelm Vetter, and Lutz H. Block*

892 Ecto-5′-nucleotidase activity in human T cell subsets. Decreased numbers of ecto-5′-nucleotidase positive cells from both $OKT4^+$ and $OKT8^+$ cells in patients with hypogammaglobulinemia. *Linda F. Thompson, Andrew Saxon, Richard D. O'Connor, and Robert I. Fox*

900 Transport of propranolol and lidocaine through the rat blood-brain barrier. Primary role of globulin-bound drug. *William M. Pardridge, Roland Sakiyama, and Gary Fierer*

909 Bioconversion of C-6 sulfidopeptide leukotrienes by the responding guinea pig ileum determines the time course of its contraction. *Steven Krilis, Robert A. Lewis, E. J. Corey, and K. Frank Austen*

916 Stimulation of thermogenesis by carbohydrate overfeeding. Evidence against sympathetic nervous system mediation. *Steven Welle and Robert G. Campbell*

926 Plasma clearance kinetics of the amyloid-related high density lipoprotein apoprotein, serum amyloid protein (ApoSAA), in the mouse. Evidence for rapid ApoSAA clearance. *Jeffrey S. Hoffman and Earl P. Benditt*

935 Ether link cleavage is the major pathway of iodothyronine metabolism in the phagocytosing human leukocyte and also occurs in vivo in the rat. *Albert G. Burger, Dennis Engler, Ulrich Buergi, Michael Weissel, Gertraud Steiger, Sidney H. Ingbar, Richard E. Rosin, and Bernard M. Babior*

950 Receptor-mediated catabolism of low density lipoprotein in man. Quantitation using glucosylated low density lipoprotein. *Y. Antero Kesaniemi, Joseph L. Witztum, and Urs P. Steinbrecher*

960 Comparison of glucosylated low density lipoprotein with methylated or cyclohexanedione-treated low density lipoprotein in the measurement of receptor-independent low density lipoprotein catabolism. *Urs P. Steinbrecher, Joseph L. Witztum, Y. Antero Kesaniemi, and Richard Elam*

965 Characterization of polypeptides serologically and structurally related to hexosaminidase in cultured fibroblasts. *F. Tsui, D. J. Mahuran, J. A. Lowden, T. Mosmann, and R. A. Gravel*

974 Differential responsiveness to insulin of endothelial and support cells from micro- and macrovessels. *George L. King, Sheldon M. Buzney, C. Ronald Kahn, Nancy Hetu, Sherry Buchwald, Susan G. Macdonald, and Lawrence I. Rand*

980 Mechanism of action of *N*-acetylcysteine in the protection against the hepatotoxicity of acetaminophen in rats in vivo. *Bernhard H. Lauterburg, George B. Corcoran, and Jerry R. Mitchell*

992 Evidence for two pathways of iodothyronine 5′-deiodination in rat pituitary that differ in kinetics, propylthiouracil sensitivity, and response to hypothyroidism. *Theo J. Visser, Michael M. Kaplan, Jack L. Leonard, and P. Reed Larsen*

1003 Description and simulation of a physiological pharmacokinetic model for the metabolism and enterohepatic circulation of bile acids in man. Cholic acid in healthy man. *A. F. Hofmann, G. Molino, M. Milanese, and G. Belforte*

1023 Identical structural and receptor binding defects in apolipoprotein E2 in hypo-, normo-, and hypercholesterolemic dysbetalipoproteinemia. *Stanley C. Rall, Jr., Karl H. Weisgraber, Thomas L. Innerarity, and Robert W. Mahley*

1032 Activation of human B lymphocytes after immunization with pneumococcal polysaccharides. *John H. Kehrl and Anthony S. Fauci*

1041 Behavior in vivo of normal and dysfunctional $C\bar{1}$ inhibitor in normal subjects and patients with hereditary angioneurotic edema. *Michael Quastel, Richard Harrison, Marco Cicardi, Chester A. Alper, and Fred S. Rosen*

APRIL AUTHOR INDEX

CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

MAY 1983 VOLUME 71 NUMBER 5

1047 *Hepatic oxygen and glucose metabolism in the fetal lamb.* Response to hypoxia. *James Bristow, Abraham M. Rudolph, Joseph Itskovitz, and Richard Barnes*

1062 Characterization of glycosylated hemoglobins. Relevance to monitoring of diabetic control and analysis of other proteins. *Robert L. Garlick, Jonathan S. Mazer, Paul J. Higgins, and H. Franklin Bunn*

1073 *Bradykinin-stimulated electrolyte secretion in rabbit and* guinea pig intestine. Involvement of arachidonic acid metabolites. Mark W. Musch, James F. Kachur, Richard J. *Miller, Michael Field, and Jeffrey S. Stoff*

1084 Ontogenesis of somatomedin and insulin receptors in the *human fetus. Vicki R. Sara, Kerstin Hall, Moriharu Misaki, Linda Fryklund, Nils Christensen, and Lennart Wetterberg*

1095 Influence of successive vagal stimulations on contractions in esophageal smooth muscle of opossum. Jaswant S. Gidda *and Raj K. Goyal*

1104 Synthesis of antibodies to hepatitis B virus by cultured lymphocytes from chronic hepatitis B surface antigen carriers. *Geoffrey M. Dusheiko, Jay H. Hoofnagle, W. Graham Cooksley, Stephen P. James, and E. Anthony Jones*

1114 Spontaneous benign prostatic hyperplasia in the beagle. Age-associated changes in serum hormone levels, and the morphology and secretory function of the canine prostate. *C. B. Brendler, S. J. Berry, L. L. Ewing, A. R. McCullough, R. C. Cochran, J. D. Strandberg, B. R. Zirkin, D. S. Coffey, L. G. Wheaton, M. L. Hiler, M. J. Bordy, G. D. Niswender, W. W. Scott, and P. C. Walsh*

1124 Prenatal allergic sensitization to helminth antigens in offspring of parasite-infected mothers. Gary J. Weil, Rabia *Hussain, V. Kumaraswami, Sriram P. Tripathy, K. S. Phillips, and Eric A. Ottesen*

1130 Vitamin K as a regulator of benzo(a)pyrene metabolism, mutagenesis, and carcinogenesis. Studies with rat microsomes and tumorigenesis in mice. *Lyonel G. Israels, Gerald A. Walls, Diane J. Ollmann, Elsa Friesen, and Esther D. Israels*

1141 Metabolic alkalosis in the rat. Evidence that reduced glomerular filtration rather than enhanced tubular bicarbonate reabsorption is responsible for maintaining the alkalotic state. *Martin G. Cogan and Fu-Ying Liu*

1161 Role of insulin in lipoprotein secretion by cultured rat hepatocytes. *W. Patsch, S. Franz, and G. Schonfeld*

1175 Iron and the liver: acute effects of iron-loading on hepatic heme synthesis of rats. Role of decreased activity of 5-aminolevulinate dehydrase. *Herbert L. Bonkowsky, John F. Healey, Peter B. Sinclair, Jacqueline F. Sinclair, Steven I. Shedlofsky, and George H. Elder*

1183 Chronic cobalamin inactivation impairs folate polyglutamate synthesis in the rat. *Janet Perry, I. Chanarin, Rosemary Deacon, and M. Lumb*

1191 Lipoxygenase pathway in islet endocrine cells. Oxidative metabolism of arachidonic acid promotes insulin release. *Stewart Metz, Michael VanRollins, Robert Strife, Wilfred Fujimoto, and R. Paul Robertson*

1206 *Platelet-derived growth factor promotes proliferation of* erythropoietic progenitor cells in vitro. *Nicholas Dainiak, Gregg Davies, Maria Kalmanti, Jack Lawler, and Vivekanand Kulkarni*

1215 Oxidant damage of the lipids and proteins of the erythrocyte *membranes in unstable hemoglobin disease. Evidence for* the role of lipid peroxidation. *Thomas P. Flynn, David W. Allen, Gerhard J. Johnson, and James G. White*

1224 Pyridoxal phosphate as an antisickling agent in vitro. *John A. Kark, Peter G. Tarassoff, and Rudolfo Bongiovanni*

1230 Natural killer cell in systemic lupus erythematosus. Defects in effector lytic activity and response to interferon and in*terferon inducers. W. L. Sibbitt, Jr., P. M. Mathews, and A. D. Bankhurst*

1240 *Fibroblast prostaglandin E_2 synthesis. Persistence of an ab*normal phenotype after short-term exposure to mononuclear cell products. *Joseph H. Korn*

1247 Inhibition of cardiac sympathetic nerve activity during intravenous administration of lidocaine. Brian D. Miller, Marc *D. Thames, and Allyn L. Mark*

1254 Intravenous infusion of L-isomers of phenylalanine and tryp*tophan stimulate gastric acid secretion at physiologic plasma* concentrations in normal subjects and after parietal cell vagotomy. *Katherine E. McArthur, Jon I. Isenberg, Daniel L. Hogan, and Susan J. Dreier*

1263 Sympathoadrenal responses to acute and chronic hypoxia in the rat. *T. Scott Johnson, James B. Young, and Lewis Landsberg*

1273 *Studies in normal and chronic granulomatous disease neu*trophils indicate a correlation of tubulin tyrosinolation with the cellular redox state. *Jayasree Nath and John I. Gallin*

1282 Modification of chemically induced diabetes in rats by vitamin E. Supplementation minimizes and depletion enhances development of diabetes. *Alfred E. Slonim, Melanie* L. Surber, David L. Page, Robert A. Sharp, and Ian M. *Burr*

1289 Isolation and chemical characterization of 2-hydroxybenzoylglycine as a drug binding inhibitor in uremia. *Diane M. Lichtenwalner, Byungse Suh, and Mark R. Lichtenwalner*

1297 Biochemical and immunologic analysis of hereditary myeloperoxidase deficiency. William M. Nauseef, *Richard K. Root, and Harry L. Malech*

1308 Plasma postheparin diamine oxidase. Sensitive provocative test for quantitating length of acute intestinal mucosal injury in the rat. *Gordon D. Luk, Theodore M. Bayless, and Stephen B. Baylin*

1316 Increase in serum bone γ-carboxyglutamic acid protein with aging in women. Implications for the mechanism of age-related bone loss. *Pierre D. Delmas, Debra Stenner, Heinz W. Wahner, Kenneth G. Mann, and B. Lawrence Riggs*

1322 Factors affecting the autologous mixed lymphocyte reaction in kidney transplantation. *Laphalle Fuller, Cathy Flaa, David Jaffe, Jose Strauss, George K. Kyriakides, and Joshua Miller*

1331 Molecular basis of hypoxanthine-guanine phosphoribosyltransferase deficiency in a patient with the Lesch-Nyhan syndrome. *James M. Wilson and William N. Kelley*

1336 Contribution of fibrin stabilization to clot strength. Supplementation of Factor XIII-deficient plasma with the purified zymogen. *L. Shen and L. Lorand*

1342 Immunoglobulin A nephropathy. Quantitative immunohistomorphometry of the tonsillar plasma cells evidences an inversion of the immunoglobulin A versus immunoglobulin G secreting cell balance. *M. C. Bene, G. Faure, B. Hurault de Ligny, M. Kessler, and J. Duheille*

1348 Canine cyclic hematopoiesis is associated with abnormal purine and pyrimidine metabolism. *W. R. A. Osborne, W. P. Hammond, and D. C. Dale*

1356 Fetal hemoglobin accumulation in vitro. Effect of adherent mononuclear cells. *Jamshid Javid and Penelope K. Pettis*

1366 Nonadrenergic effects of isoproterenol in dogs with hypoxic pulmonary vasoconstriction. Possible role of prostaglandins. *Lewis J. Rubin and Jeffrey D. Lazar*

1375 Abnormalities of in vitro immunoglobulin synthesis by peripheral blood lymphocytes from untreated patients with Hodgkin's disease. *S. Romagnani, G. F. Del Prete, E. Maggi, G. Bellesi, G. Biti, P. L. Rossi Ferrini, and M. Ricci*

1383 Protection of Factor Xa from neutralization by the heparin-antithrombin complex. *Jerome M. Teitel and Robert D. Rosenberg*

1392 Intracellular chloride activities in canine tracheal epithelium. Direct evidence for sodium-coupled intracellular chloride accumulation in a chloride-secreting epithelium. *Michael J. Welsh*

1402 In vitro nucleoside specific immune response by lymphocytes from systemic lupus erythematosus. *Chikao Morimoto, Alfred D. Steinberg, Stuart F. Schlossman, and Yves Borel*

1410 Relative ion permeability of normal and cystic fibrosis nasal epithelium. *Michael Knowles, John Gatzy, and Richard Boucher*

1418 Deficiency of carbonic anhydrase in the vasculature of rabbit kidneys. *R. M. Effros and S. Nioka*

1431 Studies on the role of specific cell surface receptors in the removal of lipoprotein (a) in man. *F. Krempler, G. M. Kostner, A. Roscher, F. Haslauer, K. Bolzano, and F. Sandhofer*

1442 Mechanisms underlying CO_2 retention during flow-resistive loading in patients with chronic obstructive pulmonary disease. *Arie Oliven, Steven G. Kelsen, E. Chandler Deal, and Neil S. Cherniack*

1450 Mechanisms of activation of the classical pathway of complement by Hageman factor fragment. *Berhane Ghebrehiwet, Bruce P. Randazzo, Joseph T. Dunn, Michael Silverberg, and Allen P. Kaplan*

1457 Acute effects of amiodarone upon the canine sinus node and atrioventricular junctional region. *Hans O. Gloor, Ferdinand Urthaler, and Thomas N. James*

1467 Iron binding proteins of iron-absorbing rat intestinal mucosa. *Glynis Johnson, Peter Jacobs, and Langley R. Purves*

1477 High-molecular weight kininogen. A secreted platelet protein. *Alvin H. Schmaier, Aaron Zuckerberg, Carol Silverman, Jaya Kuchibhotla, George P. Tuszynski, and Robert W. Colman*

RAPID PUBLICATIONS

1490 Hydrophobic surfactant treatment prevents atherosclerosis in the rabbit. *J. B. Rodgers, E. C. Kyriakides, B. Kapuscinska, S. K. Peng, and W. J. Bochenek*

1495 Ketoconazole blocks adrenal steroidogenesis by inhibiting cytochrome P450-dependent enzymes. *David S. Loose, Patricia B. Kan, Margaret A. Hirst, Robert A. Marcus, and David Feldman*

1500 Immunologic studies in asymptomatic hemophilia patients. Relationship to acquired immune deficiency syndrome (AIDS). *A. Landay, M.-C. Poon, T. Abo, S. Stagno, A. Lurie, and M. D. Cooper*

1505 Anion dependence of rabbit medullary collecting duct acidification. *D. K. Stone, D. W. Seldin, J. P. Kokko, and H. R. Jacobson*

1509 Decreased atherogenic response to dietary cholesterol in pigeons after stimulation of cholesterol catabolism in early life. *M. T. R. Subbiah, D. Deitemeyer, and R. L. Yunker*

1514 Plasma somatostatin 28 increases in response to feeding in man. *K. S. Polonsky, S. E. Shoelson, and H. M. Docherty*

1519 CORRECTION

1521 MAY AUTHOR INDEX

CONTENTS THE JOURNAL OF CLINICAL INVESTIGATION

JUNE 1983 VOLUME 71 NUMBER 6

1523 Mechanisms of insulin resistance in aging. *Raymond I. Fink, Orville G. Kolterman, Jennifer Griffin, and Jerrold M. Olefsky*

1536 Surfactant deficiency in rats without a decreased amount of extracellular surfactant. *Donald Massaro, Linda Clerch, Donald Temple, and Horst Baier*

1544 Partial pancreatectomy in the rat and subsequent defect in glucose-induced insulin release. *S. Bonner-Weir, D. F. Trent, and G. C. Weir*

1554 Effects of free fatty acid availability, glucagon excess, and insulin deficiency on ketone body production in postabsorptive man. *J. M. Miles, M. W. Haymond, S. L. Nissen, and J. E. Gerich*

1562 Impaired phosphorus conservation and 1,25 dihydroxyvitamin D generation during phosphorus deprivation in familial hypophosphatemic rickets. *Karl L. Insogna, Arthur E. Broadus, and Joseph M. Gertner*

1570 Interaction of phosphatidylserine-phosphatidylcholine liposomes with sickle erythrocytes. Evidence for altered membrane surface properties. *Robert S. Schwartz, Nejat Düzgünes, Danny Tsun-Yee Chiu, and Bertram Lubin*

1581 Characterization of the insulin resistance of aging. *John W. Rowe, Kenneth L. Minaker, Johanna A. Pallotta, and Jeffrey S. Flier*

1588 Interactions among prostaglandin E_2, antidiuretic hormone, and cyclic adenosine monophosphate in modulating Cl- absorption in single mouse medullary thick ascending limbs of Henle. *R. Michael Culpepper and Thomas E. Andreoli*

1602 Specific in vitro antimannan-rich antigen of *Candida albicans* antibody production by sensitized human blood lymphocytes. *A. Durandy, A. Fischer, and C. Griscelli*

1614 Cigarette smoke inhibition of ion transport in canine tracheal epithelium. *Michael J. Welsh*

1624 Control of renal hemodynamics and glomerular filtration rate in chronic hypercalcemia. Role of prostaglandins, renin-angiotensin system, and calcium. *Moshe Levi, Marilyn A. Ellis, and Tomas Berl*

1633 Delineation of four cell types comprising the giant cell tumor of bone. Expression of Ia and monocyte-macrophage lineage antigens. *G. R. Burmester, R. J. Winchester, A. Dimitriu-Bona, M. Klein, G. Steiner, and H. A. Sissons*

1649 Adenosine deaminase messenger RNAs in lymphoblast cell lines derived from leukemic patients and patients with hereditary adenosine deaminase deficiency. *Gwendolyn S. Adrian and John J. Hutton*

1661 Effect of reduced renal mass on ammonium handling and net acid formation by the superficial and juxtamedullary nephron of the rat. Evidence for impaired reentrapment rather than decreased production of ammonium in the acidosis of uremia. *John Buerkert, Daniel Martin, David Trigg, and Eric Simon*

1676 Defect in cooperativity in insulin receptors from a patient with a congenital form of extreme insulin resistance. *Simeon I. Taylor and Sheryl Leventhal*

1686 Cell-mediated immunity in Legionnaires' disease. *Marcus A. Horwitz*

1698 Monogenic control of variations in antipyrine metabolite formation. New polymorphism of hepatic drug oxidation. *M. B. Penno and Elliot S. Vesell*

1710 Interaction of desialated guinea pig erythrocytes with the classical and alternative pathways of guinea pig complement in vivo and in vitro. *Eric J. Brown, Keith A. Joiner, and Michael M. Frank*

1720 Specific anti-influenza virus antibody production in vitro by lymphocytes from a subset of patients with hypogammaglobulinemia. *Robert Yarchoan, Helen S. Schneider, Betty B. Wray, and David L. Nelson*

1728 Suppression of NZB/NZW murine nephritis by administration of a syngeneic monoclonal antibody to DNA. Possible role of anti-idiotypic antibodies. *Bevra H. Hahn and Fanny M. Ebling*

1737 Impaired culture generated cytotoxicity with preservation of spontaneous natural killer-cell activity in cartilage-hair hypoplasia. *Glenn F. Pierce, Charlotte Brovall, Bernice Z. Schacter, and Stephen H. Polmar*

1744 Biosynthesis of 5-aminolevulinic acid and heme from 4,5-dioxovalerate in the rat. *Kathryn A. Morton, James P. Kushner, James G. Straka, and Bruce F. Burnham*

1750 Restoration of immune responses of aging hamsters by treatment with isoprinosine. *Kwong Y. Tsang, H. Hugh Fudenberg, and Mark J. Gnagy*

1756 Prostaglandin synthesis by rat glomerular mesangial cells in culture. Effects of angiotensin II and arginine vasopressin. *Linda A. Scharschmidt and Michael J. Dunn*

1765 X-linked lymphoproliferative syndrome. Natural history of the immunodeficiency. *John L. Sullivan, Kevin S. Byron, Frank E. Brewster, Sharon M. Baker, and Hans D. Ochs*

1779 HLA identical leukemia cells and T cell growth factor activate cytotoxic T cell recognition of minor locus histocompatibility antigens in vitro. *Paul M. Sondel, Jacquelyn A. Hank, Thad Wendel, Bridget Flynn, and Marek J. Bozdech*

1787 Beta-adrenergic receptors in lymphocytes and granulocytes from patients with cystic fibrosis. *Pamela B. Davis, Lynda Dieckman, Thomas F. Boat, Robert C. Stern, and Carl F. Doershuk*

1796 Physicochemical and immunohistological studies of a sulfobromophthalein- and bilirubin-binding protein from rat liver plasma membranes. *Wolfgang Stremmel, Michael A. Gerber, Valery Glezerov, Swan N. Thung, Shaul Kochwa, and Paul D. Berk*

1806 Effects of parathyroid hormone on skeletal muscle protein and amino acid metabolism in the rat. *Alan J. Garber*

1822 Isolation and culture of microvascular endothelium from human adipose tissue. *Philip A. Kern, Ann Knedler, and Robert H. Eckel*

1830 Effects of dexamethasone on mediator release from human lung fragments and purified human lung mast cells. *Robert P. Schleimer, Edward S. Schulman, Donald W. MacGlashan, Jr., Stephen P. Peters, Edward C. Hayes, G. Kenneth Adams III, Lawrence M. Lichtenstein, and N. Franklin Adkinson, Jr.*

1836 Use of human Factor VIIa in the treatment of two hemophilia A patients with high-titer inhibitors. *Ulla Hedner and Walter Kisiel*

1842 Effect of very high dose D-leucine^6-gonadotropin-releasing hormone proethylamide on the hypothalmic-pituitary testicular axis in patients with prostatic cancer. *Barry Warner, Thomas J. Worgul, Joseph Drago, Lawrence Demers, Maria Dufau, Devorah Max, and Richard J. Santen*

1854 Prognostic value of angiographic indices of coronary artery disease from the coronary artery surgery study (CASS). *Ivar Ringqvist, Lloyd D. Fisher, Michael Mock, Kathryn B. Davis, Hans Wedel, Bernard R. Chaitman, Eugene Passamani, Richard O. Russell, Jr., Edwin L. Alderman, Nicholas T. Kouchoukas, George C. Kaiser, Thomas J. Ryan, Thomas Killip, and David Fray*

1867 Molecular and functional changes in spectrin from patients with hereditary pyropoikilocytosis. *W. J. Knowles, J. S. Morrow, D. W. Speicher, H. S. Zarkowsky, N. Mohandas, W. C. Mentzer, S. B. Shohet, and V. T. Marchesi*

1878 Human erythrocyte antigens. Regulation of expression of a novel erythrocyte surface antigen by the inhibitor Lutheran *In(Lu)* gene. *Marilyn J. Telen, George S. Eisenbarth, and Barton F. Haynes*

1887 Genetic heterogeneity in partial adenosine deaminase deficiency. *Rochelle Hirschhorn, Frank Martiniuk, Vivien Roegner-Maniscalco, Amy Ellenbogen, Jean-Louis Perignon, and Trevor Jenkins*

RAPID PUBLICATION

1893 Cultured human endothelial cells generate tissue factor in response to endotoxin. *M. Colucci, G. Balconi, R. Lorenzet, A. Pietra, D. Locati, M. B. Donati, and N. Sermeraro*
